

Calere Sauna Glass Wall measure instruction

You can measure right side glasses and glass doorway with this instruction.

- A) Please first select the right model of Calere Sauna Glass Wall before starting measuring.
- B) You may see also the max and min values for each measuring units (A, B, C, D, E, F).
- C) Measure minimum from 3 different places height and width. Please put in your order narrowest width and lowest height in mm. Don't take anything away from your measure result. We will count dimensions for each measure hole.
- D) You may use normal measure instrument which shows result in 1 mm dimension. You may use also laser instrument but please note that the dimension should be in 1 mm.

- E) Please measure as follows doorway and side glass (es):

1. Measuring width

Please take from 3 different place width for each interior hole. Please choose narrowest width. Put result in your order.

2. Measuring height

Please take from 3 different place width for each interior hole. Please choose lowest height. Put result in your order.
